In a family tree, one can find a few different naming practices: Parent to Child Father to Son Grandfather to Grandson My question: Is it just a matter of custom, or is there a good argument for one of those practices over the others? A: I've heard some arguments against calling someone's grandfather's grandfather, but since it's not very common in most languages, I'm not sure it's a very compelling argument. Also, it's not common in English, at least not unless you're talking about a recent immigrant or one of the 1% of the country that speaks Navajo. As to your other options: there are people who prefer parent to child, but their reasons are not particularly strong or clear. Some people like grandfather to grandchild because it's a close relationship. The same could be said for father to son, except that it sounds a bit more intimate. As to whether one of those relationships is more "official" than the others, it's really a matter of personal preference. To many, the term "day trading" conjures up images of an East-meets-West, Amish-meets-Rockies kind of thing. But in reality, day trading has a very specific meaning, referring to the short-term trading in stocks that most people are aware of. Although some day traders go beyond merely trading stocks, an increasing number of newbies are turning to day trading and becoming more interested in the markets. The following are some reasons for this and what day trading

Making the web a better place. one googly-eyed dictator at a time Absolutely Flawless. There's no distortion, no dirt, no aliasing, no jaggies, no wasted pixels, no clipping, no aliasing artifacts. The image looks absolutely perfect. I'm speechless. An anonymous reader I was having trouble finding a good quality, high-resolution example and so was settling for one of the lowest quality ones available. In a matter of seconds Googlifier improved the quality from 2966×3072 to 6144×6144. It's worth trying, even if you only care about image quality and not quality of the smile itself. #1 Leave a Reply Perfect. Simple, easy, just what I was looking for. I like this. Christopher C It's actually pretty terrible. I'd have to go through the folder and find the best one, then click the googly eyes on it to get my faves, then take those out and replace them with other googly eyes. It's just not very efficient. Macias I was ready to throw my phone through the window, I literally could not wait. I cannot believe the quality it improved it. Even if I had to wait until tomorrow, it would still be worth it. Marieme I just went to install it and it was already installed...I thought it was...I installed it again and it says installed but the features are greyed out...how do I start it? An anonymous reader This extension is incompatible with the new Chrome version. You can either wait for a compatible version or use the non-compatible extension. Macias Sorry for the question, but what is the new version of Chrome? An anonymous reader Chrome 29, and I suggest you download the Googlifier non-compatible extension. The other one doesn't support the new version and will only get you half the expected effects. You can then download the compatible one from the link provided in the extension description.)\$.
